

ABOUT THE PROJECT

The EcoAI EduNetwork Initiative (EAIEN) project presents a visionary approach to transforming high school education in line with key European Union educational priorities.

Our Objective

The primary objective of the EAIEN project is the development of a robust green skills education ecosystem. This involves creating an extensive Open Educational Resources (OER) hub, infused with AI-driven teaching and learning methodologies.

Our Aim

EAIEN aims to enhance awareness and understanding of green skills among educators and students. This objective aligns seamlessly with the EU's priority of stimulating innovative teaching and learning practices. By leveraging AI technologies and creating a rich repository of green skills resources, the project introduces novel, effective teaching methods and learning materials.

Funded by
the European Union

WHAT HAS BEEN DONE SO FAR?

1st Transnational Project Meeting

On **March 14th-15th**, the 1st Transnational Project Meeting for the EAIEN took place in **Eskisehir, Turkey** and was hosted by Özel Çağdaş Schools.

During the meeting, partners reflected on the progress made so far, assessed completed tasks, and consolidated key project deliverables. The discussion revolved around the milestones achieved, challenges encountered, and lessons learned, ensuring that all participants had a clear understanding of the project's current standing.

Promotional Videos

In our Youtube Channel [@EAIENEUPROJECT](https://www.youtube.com/@EAIENEUPROJECT) you can find our promotional videos, available in English, Turkish, Romanian and Greek.

WHAT IS NEXT?

In the coming months EAIEN will complete the development of the Learning, Training and Teaching Activities.

Monthly Online Meetings

During the monthly online meetings, the consortium talks about the project progress and deadlines.
